Welcome to Canohm

Good Service matters.

Canohm is a major importer and distributor of high quality audio/visual solutions including A/V mounting products, radio receivers, Hi-Fi speakers, and automation products. We pride ourselves on sourcing and distributing leading brands from around the world to suit both commercial and residential applications.

Canohm is proud to be the Australian distributor for Vogel's, Sangean, EZYmount, Future Automation, Amina, Minix and Wireworld Cable Technology.

To support the fine brands and products we represent, we offer our valued customers and end users the highest possible levels of technical support and product guidance, as

well as after sales service second to none in this industry. Our trained team of experts go out of the their way to ensure the best possible customer experience. We have a nationwide team of sales representatives and are proud to support our customers across Australia.

We have recently moved our operations to a new state of the art office, showroom and warehouse complex located in Port Melbourne, Victoria. Canohm pursues the highest levels of professionalism at all times and in all areas of the business. Canohm's products comply with all Government and Regulatory standards.

Safety & quality is what sets us apart

02 Vogel's For Sure

A company born from a passion to improve

Vogel's, from the Netherlands, is the one of the world's largest manufacturers of audio/visual mounting solutions. What began as a personal quest for perfection has developed into a successful international company, producing a highly distinctive range of mounts and mounting systems for audio, video and multimedia equipment. Vogel's products combine versatile functionality and robust performance with a sleek design. Over forty-five years, Vogel's solutions have been based on the talent of people who are completely

committed to the products they make and to the customers who use those products. Since the development of the world's first speaker wall mount in 1973, the Dutch company has regularly produced award-winning solutions that make life easier for people. Today, Vogel's is famous for its exceptional range of mounting solutions for LCD, OLED and LED screens, audio/video equipment and tablets, and for anywhere in the home. All products are developed to offer extra personal comfort and industry leading safety.

What makes Vogel's so special?

Design/ Styling

Vogel's stands out from the competition by its unique and timeless design. It is no surprise that Vogel's continues to win design awards all over the world and of course the beautiful design is combined with very sophisticated functionality.

Innovative

Time and time again Vogel's introduce surprising new designs for both existing and new applications. A range of short throw projector mounts, a complete range of electronic projector lift systems, a modular range of ceiling solutions are just a few of Vogel's complete program.

Quality & Safety

All Vogel's products comply with the highest industry standards for quality and safety. Only the best materials are used. All products for professional use are tested to carry at least five times the specified weight (TÜV-GS).

Complete Solutions

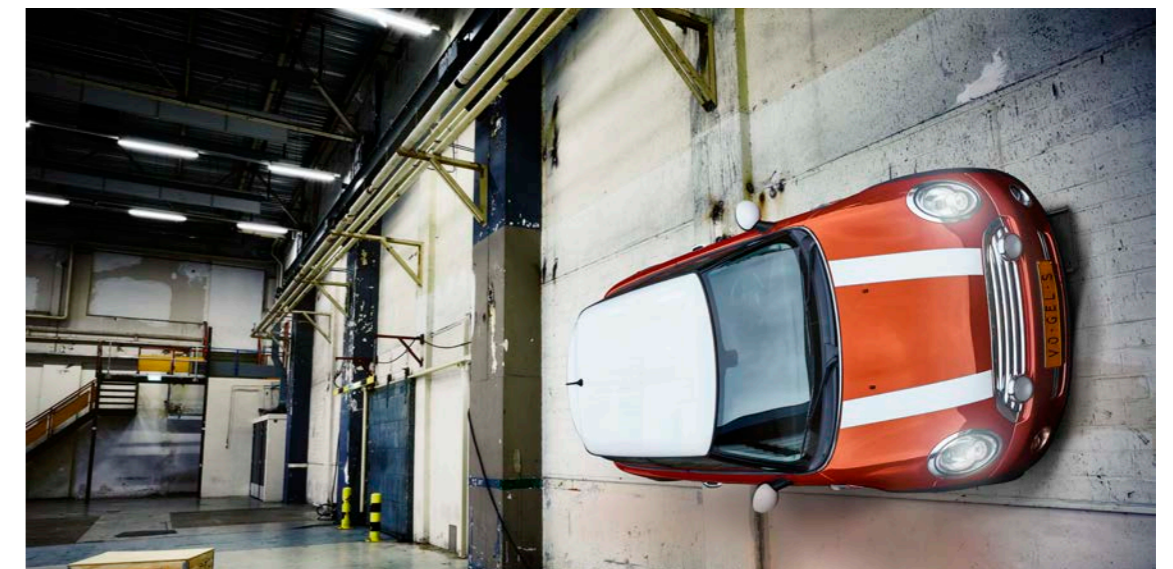

A complete range of mounting-solutions for both projectors and flat panel displays. From simple to advanced. From static to electronically operated. Vogel's has a solution for every AV mounting application; A one-stop shop.

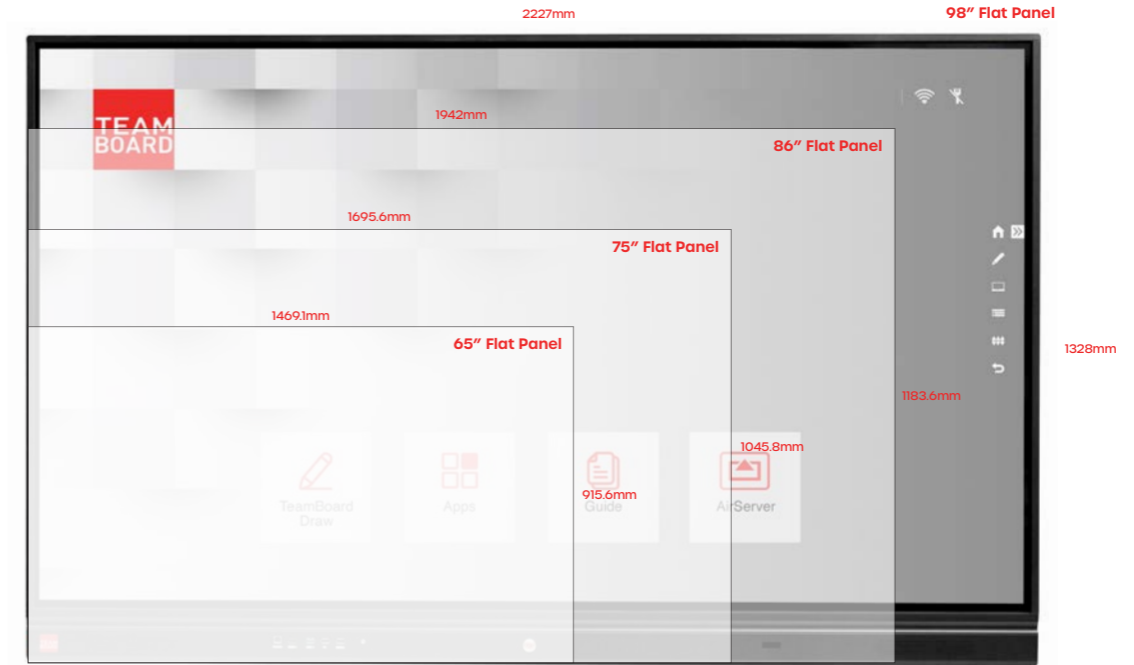

Pro-AV mount advisor

Find the exact solution you need

Vogel's has developed the Pro-AV Mount Advisor. The product range of Vogel's consists of an extensive number of (modular) products. It is possible to compose a solution for nearly every application. In a few steps you can find the exact solution you need. With the Pro-AV Mount Advisor you will save a lot of time! It's a great help for everybody looking for the perfect Vogel's solution. The risk of screen damage during installations is significantly reduced.

TeamBoard Features

20 Touchpoint Capability

With the latest Slim IR technology, TeamBoard IFPD's allow up to 20 individual points of touch on the display at one time.

No matter the application, TeamBoard allows for the ultimate collaborative experience where everyone has the ability to put their touch on the screen. This feature is particularly powerful in the tilt to table orientation.

Front-facing Speaker

No need for additional speakers with the TeamBoard's front facing 15w speakers built into the bezel of the panel.

Wall & Trolley Mountable

All TeamBoard panels include a standard wall mount to complete the solution out of the box. There is also a range of mobile solutions including a tilt table trolley to turn any TeamBoard into a touch table.

All TeamBoard panels are VESA compliant which makes them completely compatible with the Vogel's range of professional solutions.

Interactive Apps

The TeamBoard OS Android module plugs directly into your screen for seamless access to a fully licensed Google Play Store. Access thousands of certified apps to fully explore the power of an Android platform designed to work with your TeamBoard from the push of a button.

Android 8.0 System

Preloaded with Android 8.0, the OS has been specially designed for simplicity. It is completely plug and play with no additional drivers required for interaction. Simply turn the TeamBoard on and you can easily take notes, annotate, draw, rotate, and scale all your digital content with simple touchscreen gestures. With 32GB of storage, you can save all your work to recall later or share by email.

4K Resolution

Bring your presentations to life with the latest 4K 60Hz resolution. (3840 x 2160).

TeamBoard Draw

TeamBoard Draw™ is an intuitive application built into the screen that's easily accessible from the home screen. You can use it as a whiteboard, add images, add backgrounds and more. With a variety of pre-installed backgrounds including a blackboard, you can share the content by email or by the built in QR code generator.

Now with built-in Air Server

All TeamBoard Interactive Flat Panels now include AirServer App which implements AirPlay, Google Cast and Miracast so you can wirelessly display your content without installing yet another 3rd party app. This dynamic wireless solution also offers 4K 60fps and custom background settings.

03 TEAM BOARD

TeamBoard Connected

TeamBoard designs and manufactures Interactive Touchscreen Solutions for corporate, education, and many other institutional presentation environments.

With headquarters in Toronto, Canada, we serve our customers through a global network of distributors and dealers. Founded in 1993 as part of the Egan Visual group of companies, TeamBoard has taken the lead to develop interactive whiteboards as one of the most exciting human-computer interaction devices available today.

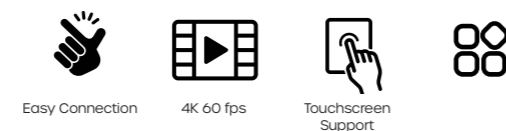

TeamBoard has been there from the beginning as one of the founders of

interactive technology evolving from the early days of interactive projector system to now developing market leading interactive flat panel displays.

Built-in Air Server

TeamBoard Interactive Flat Panels now include AirServer App which implements AirPlay, Google Cast and Miracast so you can wirelessly display your content without installing yet another 3rd party app.

Who are Future Automation?

A company with a mission to be at the forefront of the luxury automation industry, while never compromising on the quality of our customer service.

We achieve this mission by utilising state of the art tools, components and knowledge. Worked in with cohesion to create an advanced collection of automated and manual mechanisms designed and manufactured in-house by master craftsmen.

Our consistently innovating design studio based in England, generates premium performance-driven solutions which are fabricated by an experienced team of engineers using industry-leading manufacturing techniques.

Every mechanism manufactured by our team is individually assembled and tested by hand to ensure it meets stringent quality control criteria.

We're so confident in our products that we offer a robust manufacturer warranty on all Future Automation mechanisms. Experience automation of the future and convert your environment like you've never thought possible.

UBLS
Under Bed Lift & Swivel

The Under Bed TV Lift & Swivel is a unique and impressive mechanism that stores a flat screen under a bed then swivels when in the up position to allow multiple viewing angles, negating the need for cabinetry at the foot of the bed.

Compact and sleek in design, the Under Bed TV Lift offers an alternative to traditional flat screen TV lifts and with its pop-up design, helps create a different dimension to the interior design of a room.

SPS
Sliding Panel System

Offering the ultimate wow factor, the Future Automation SPS Sliding Panel System allows complete in-wall screen concealment at the push of a button. Enabling users to transform their viewing environment, the Sliding Panel System's distinctively brilliant design and one of a kind functionality are sure to turn anyone's head.

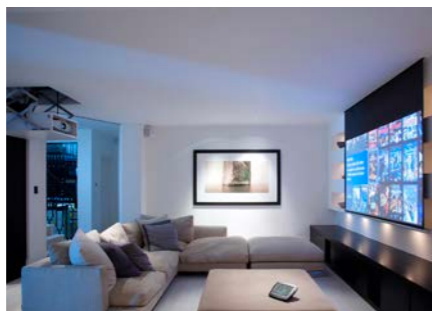

By concealing the user's TV inside the wall cavity, hidden behind a single or pair of wall panels, the SPS Sliding Panel System keeps the screen out of view when not needed while making sure it's easily and quickly available when required.

After retracting the wall panel back into the wall cavity, it is then raised up before the screen is automatically pushed out to sit flush with the surrounding wall panels.

CHRT
TV Ceiling Hinge & Telescope

The CHR Range is our latest generation of TV Ceiling Hinge with Telescope mechanisms, suitable for hinging screens from 40" to 98" up to 90° out of a ceiling before lowering the screen between 20" and 30" (mechanisms size dependant). Fully concealable within the ceiling cavity thanks to its Plaster In Edge, the CHRT Range is also available without telescope function (CHR), with a standalone swivel function (CHRS) or a combined swivel and telescope (CHRST).

Your TV, secured with style

Strong and Safe

Fixing requirements	Backbox CV/SW345 or Mounting Blocks/ Epoxy	Backbox CV/SW345 or Mounting Blocks/ Epoxy

08

The invisible speaker company

Enjoy truly exceptional sound from speakers that are 100% invisible!

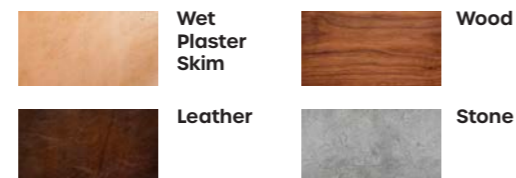

The benefit of Amina invisible speakers means there is no compromise between high quality audio and design. Regularly used in residential and commercial spaces ranging from beautiful family homes, modern and historic properties to exclusive hotels, design retail stores, restaurants, museums and spa complexes, invisible speakers produce a non directional, open sound that fills beautiful spaces.

Acoustic and Construction Benefits

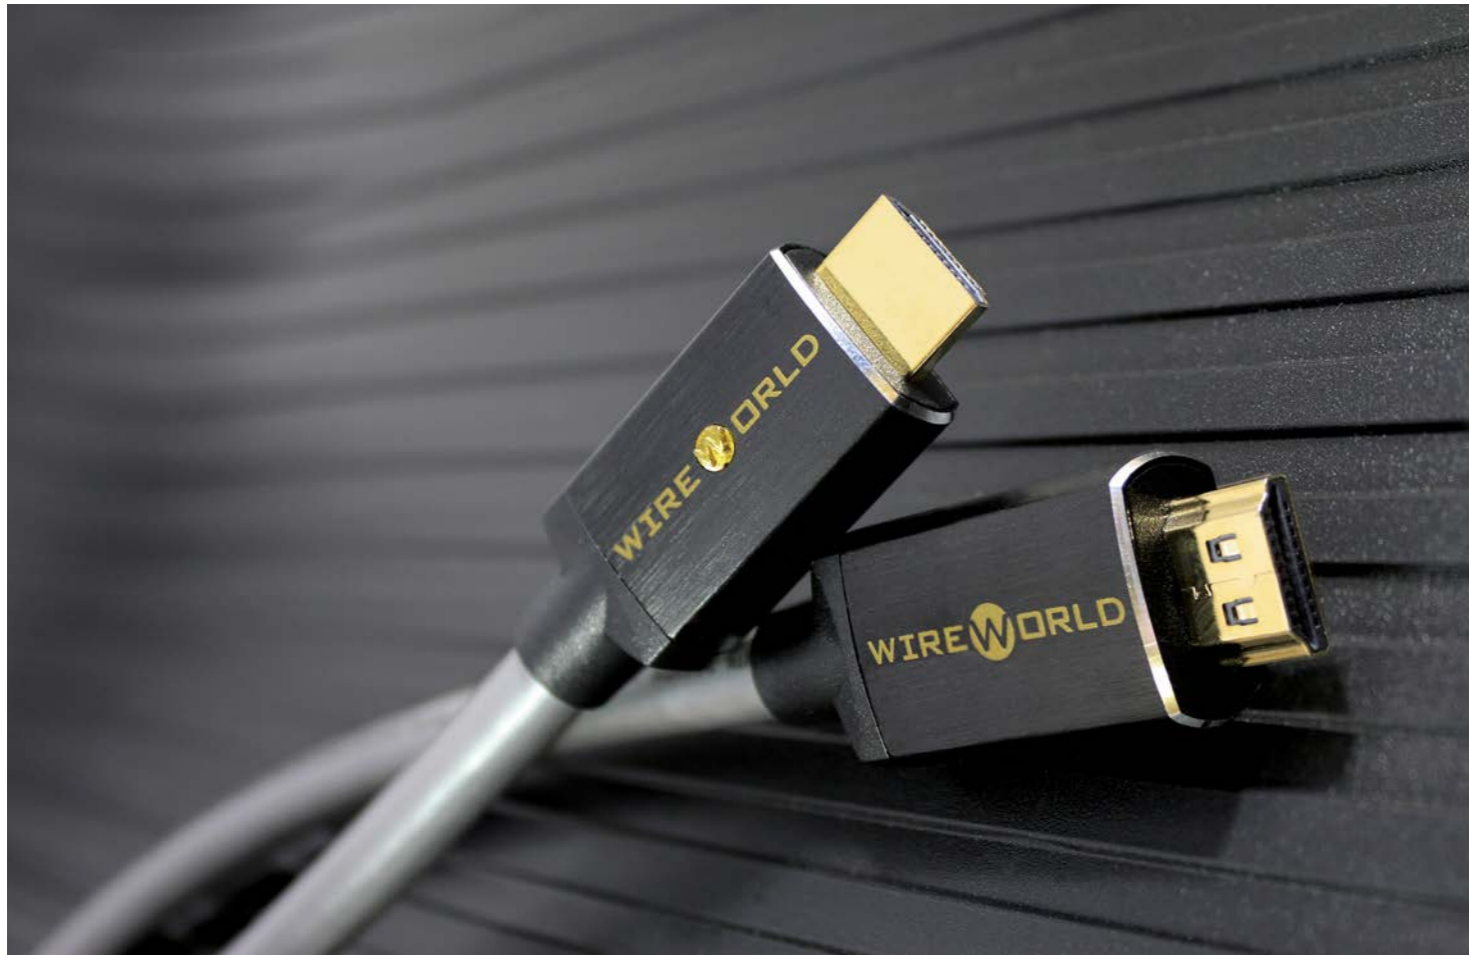

Amina Loudspeakers can be bonded to the rear surface of most sheet material measuring 1-3mm in thickness (dependent on material).

Covering Materials

Amina Loudspeakers can be bonded to the rear surface of most sheet material measuring 1-3mm in thickness (dependent on material).

For more information on finishes, application and installation please speak to the Canohm team.

09 WIREWORLD
CABLE TECHNOLOGY

Engineered for reality

Neutral cables are essential for lifelike music reproduction, simply because the cable effects that color the sound also remove essential details and expression from the music. Identifying the colorations of most components is difficult because it is impossible to compare them to a perfect component. However, cable colorations are much easier to identify, since cables can be compared to a virtually perfect cable, a direct connection between components.

Green Initiative

Wireworld Cable Technology is committed to doing our part for our ecology and the betterment of the planet. Sound isn't the only thing we'd like to see getting clearer. With every Platinum cable sold, a tree will be planted to help the land and the people living on it. Thank you for choosing Wireworld. We hope you will join us and support one of these worthy environmental causes.

"Every detail can affect the purity of signal. Conductor material, insulation and connectors are all important, but designing the most efficient path for electromagnetic energy is the key to lifelike music reproduction."

David Salz
President, Cable Designer

Interconnect

Wireworld interconnects are designed, tested and manufactured to provide the most sonically transparent path for your music. Their patented DNA Helix internal structure consists of parallel strands in layered flat conductors that channel electromagnetic signal energy more efficiently than coaxial and twisted pair cables. They also benefit from Composilex 3, a third generation composite insulation technology with lower triboelectric noise than any conventional low loss insulation, including DuPont Teflon®. Wireworld Series 8 interconnects preserve tone quality and imaging.

Digital Audio

In theory, digital connections are supposed to be less sensitive than analog connections, but cable polygraph tests have shown that the digital losses do occur. Wireworld digital cables advance the art of preserving the natural tone quality, spatial imaging and exciting dynamics of live music.

HDMI

Wireworld's award winning and uniquely engineered Uni-Path™ and Symmetricon® designed HDMI cables are widely regarded as the reference standard for HDMI video and audio fidelity. Every current model exceeds the official HDMI2.0 specifications supporting 18Gbps, 4K/60fps, 3D 4:4:4 colour and HDR.

Speaker Cable

Our audibly superior designs and materials clearly disprove the common belief that a heavier gauge is all a cable needs. From a highly flexible in-wall, to objectively engineered reference standards, Wireworld speaker cables will open up your ears to an exciting new listening experience.

10 MINIX®

Strive for Excellence

MINIX was born out of a shared passion for advanced technology and dynamic designs; ever since its establishment in 2008, we have been focused on creating innovative, well-made products. By combining the finest materials, functional design, and considered details, we pride ourselves on delivering original and useful tech products.

We strive for exceptional detail and unparalleled quality in products and materials, standing firmly behind the enduring, premium quality of our products. Our products aspire for more through quality design that is built to last, and small but thoughtful details that make the biggest difference.

Creativity is at the heart of everything we do. Our talented team brings ideas to life through a culture of constant innovation and curiosity. We're always pushing the boundaries of creativity in the pursuit of product excellence. Our relentless pursuit of innovation drives us to deliver new technologies that truly benefit people and make everyday life more convenient.

NEO G41V-4 Windows 10 Pro Fanless Mini PC

Designed from the ground up, the all-new MINIX NEO G41V-4 is the ultimate fan less, triple-display Mini PC integrating high-end technologies into an ultra-small form factor.

Powered by Intel Gemini Lake N4100 and pre-installed with Windows 10 Pro, NEO G41V-4 delivers responsive performance, high-speed connection options and effortless multi-tasking.

NEO G41V-4 is purpose-built for professional workloads, advancing the innovation of its fanless predecessors with more power and pioneering a new breathable chassis.

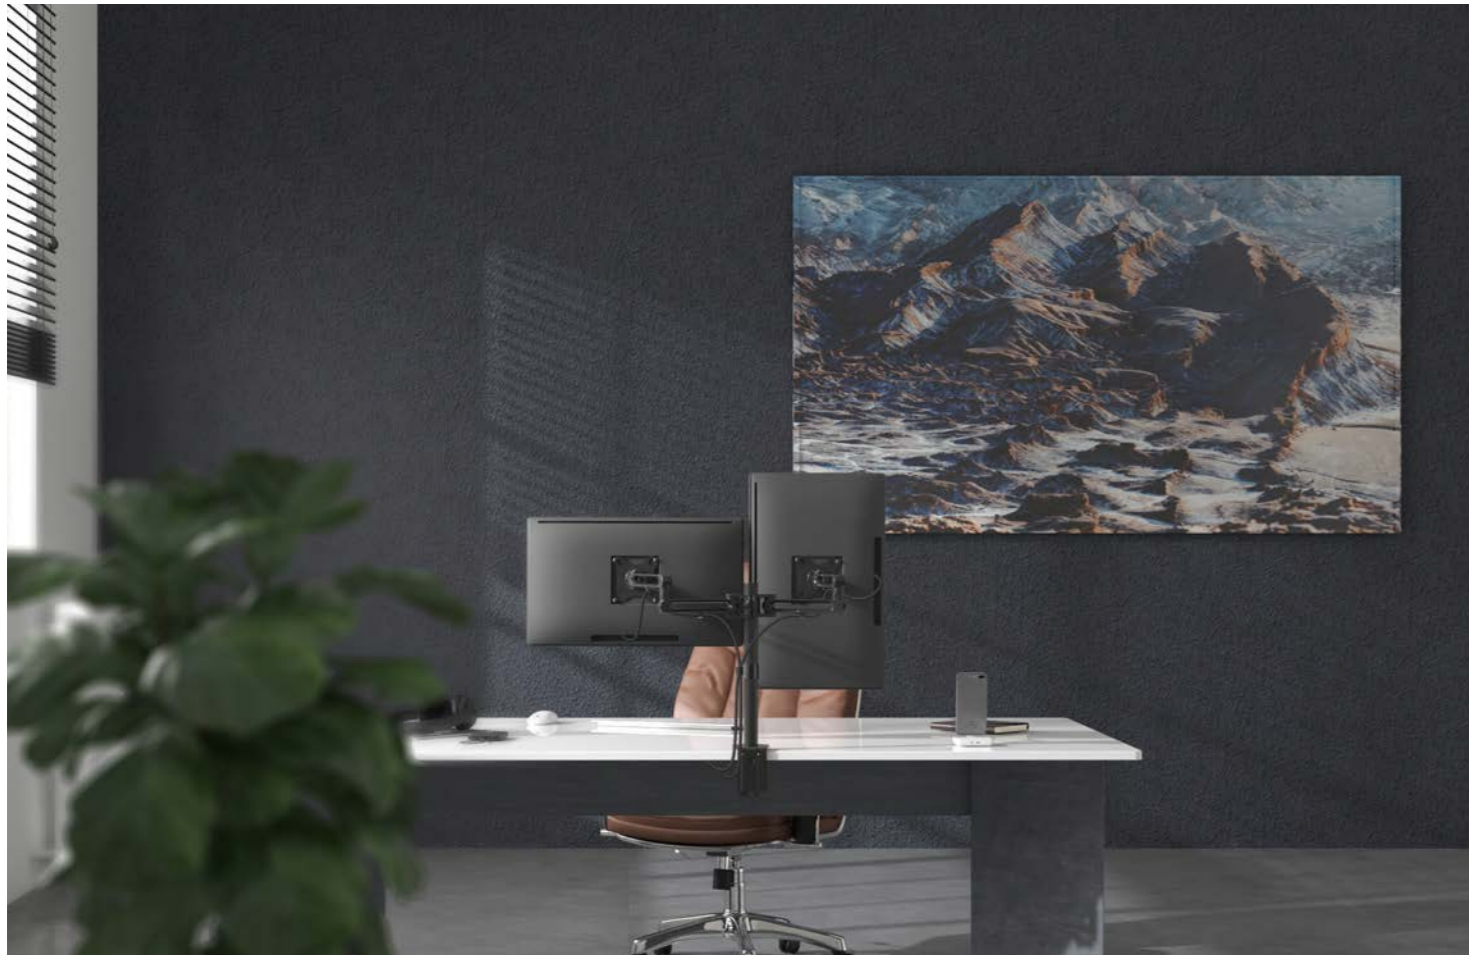

NEO Z83-4 Plus Windows Pro Fanless Mini PC

NEO Z83-4 Plus is designed to meet the diverse needs of industrial commercial applications; an ideal Digital Signage, POS and Thin Client Solution. NEO Z83-4 Plus is a fully configured, complete system pre-installed with 4GB DDR3L memory, 64GB eMMC 5.1 (MLC) internal storage and Windows 10 Pro OS. No setup or installation required.

NEO C-UH Aluminium USB-C to 4-Port USB 3.0 And 4k @ 30hz HDMI Adapter.

Supporting up to 4K @ 30Hz, the adapter delivers a stunning visual experience with crystal clear picture quality and vibrant multi-channel digital surround sound; perfect for streaming movies or watching videos from your USB-C equipped device on an external display.

11 Ergovida

Ergonomic Home & Office Solutions

The Ergovida range of desks and chairs for adults and kids is the perfect solution to furnish your work and home environment with ergonomic furniture that supports your back and posture whilst you work, study and play.

With many of us spending each day sitting in front of a desk, Ergovida addresses the ergonomic needs of your back, neck, arms and legs. This fun and functional furniture range is simple and durable, whilst helping to prevent postural damage, backache and headache.

The many design features include tiltable desktops, height adjustment for desks and chairs, winged backrests on chairs, and child-safety features for the kids range to protect fingers, eyes, and backs for general wellbeing.

Choose Ergovida furniture to get on with your day - in a healthy way!
