

Technology

From the Canton patented wave surround; to the deep, accurate bass of the DC technology; to the high performance aluminum drivers; the Chrono series wants for nothing.

The series comprises an active subwoofer, two floor-standing models, a center channel, and a bookshelf speaker – meeting the demands of the highest quality audio or home theater system.

Design

Striking, diamond-cut aluminum trim rings give the Chrono series their characteristic look. Mounted in the solid high-gloss front baffle, they contrast beautifully with the lacquered baffle surface and the aluminum cones of the drivers.

The Chrono series is available in the following finishes: black, silver, and a beech/silver combination. Black fabric grills are also provided.

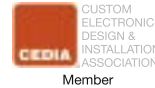

The optional LS 650 speaker stand is a beautiful complement to the Chrono 502 and 505 speakers.

Pure Music – since 1972

Canton is an experienced manufacturer with a tradition of hand-made loudspeakers. Outstanding design and the most technically sophisticated engineering are among the company's hallmarks as well as a commitment to constant innovation.

High Design, High Performance

The Chrono series has an exciting and innovative look. The provocative design, coupled with the cutting edge technology of the Ergo series, makes the Chrono series our most unique speaker line. That means top design and high-end sound.

High quality bi-wiring connection terminal with short-circuit-proof screw terminals for perfect contact.

Loudspeaker pedestal with integrated shock absorbers and vertically adjustable spikes for optimal decoupling.

Aluminum cone drivers with Canton patented wave surrounds for maximum excursion and accurate low frequency response.

Adjustable subwoofer technology for flexible room compensation and perfect sound in all installation locations.
